Real time aggregation from across multiple channels

Head office can view consolidated sales, customers, inventory, payment and expense information for any location with our innovative real-time data synchronization mechanism, as if it is a local store. No need of day-end process or manual upload, download or reconciliation is required.

Centralized master data management

Saves time and brings consistency by eliminating store's efforts from creating masters such as products, pricing, discount and offers. All can be controlled and managed from head office and will reflect across stores automatically on real-time. Head office can set different product catalog, pricing or promotions for different region/stores as well.

Track stock movement

Move stock between stores or your warehouse with stock transfers, and quickly perform inventory lookups across all your sales channels. Transfer centrally or at store level in real time. Automatically generate purchase orders and transfer orders based on inventory levels.

Run offers and promotions based on data

Analyze consolidated customer information to get more insight about your customers' buying patterns, preferences etc. This will help you to tailor offer and promotions for across the stores or region wise to increase customer footfall and revenue.

Just Billing cloud advantages

Online & offline

Operate in offline mode automatically when you lose Internet connection. Each device runs independently even if the internet is down. Automatic data streaming would start again in the back ground as soon as the internet connection is restored. No manual upload, download or reconciliation is required.

Highly scalable

Whether you have a single location or hundreds, Just billing is extremely scalable. You do not need to invest on head office server, hardware or infrastructure. This not only just saves your cost or capital investment, but also the effort, resources and expertise to configure and manage multiple locations.

Highly secure

Your data is fully secure with our data centers from the world's top cloud service provider Amazon AWS, which meets all the international standards, compliances and governance such as PCI, ISO, SOC. Moreover, all communication with cloud head office are encrypted with HTTPS protocol.

No maintenance

No maintenance is required for the software, your data or servers. Be on top of the latest version of Just Billing software always with automatic upgrades. All your data are automatically backed up every day on our cloud servers. Setup a new device with your data automatically just in few minutes.
